## **Intermediate Metal Post & Clip System**

### **30 YEAR GUARANTEE**

With its delta profile and ability to accommodate all woven wire fence patterns, Versalok® has been designed with lozenge shaped holes to easily and securely lock in the patented stainless steel Versalok® clip. Where required, two clips can be inserted into one hole thereby increasing product versatility.

Quick and simple to erect, the Versalok® Post, combined with Hampton's steel box and angle Strainer Systems, provides a completely integrated metal fence post system; the first of its kind manufactured in the UK. It also provides the ideal companion for Hampton's extensive range of fencing products.

Versalok® provides a stronger and more versatile alternative to other metal intermediate posts on the market.

The stainless steel clips for Versalok® can be inserted anywhere on the post making it a completely user friendly product.

## Designed, patented & manufactured by Hampton Steel Ltd

- ◆ Manufactured with a Zinc, Magnesium, Aluminium coating providing an excellent versatile long life alternative to timber posts
- ◆ Easy to install-hand held post drivers can be used
- ◆ Versalok<sup>®</sup> is suitable for the widest range of fencing patterns
- ◆ Versalok<sup>®</sup> stainless steel clips can be inserted anywhere along the posts
- ◆ Two Versalok<sup>®</sup> clips can be inserted in one hole
- ◆ Versalok<sup>®</sup> posts are designed to spread when driven into the ground to help prevent lifting
- ◆ Produced in standard lengths: 1.8m, 2.2m & 2.9m other lengths are available.
- ◆ Versalok<sup>®</sup> posts are manufactured from high yield strength steel in 1.5mm and 2.5mm options.

Versalok<sup>®</sup> posts are designed to spread open as they are inserted into most ground conditions, helping to prevent unwanted lifting or sinking.

The logo for HAMPTON is displayed within a dark red rectangular box. The word "HAMPTON" is written in a bold, white, sans-serif font. The letter "O" is replaced by a yellow circle. A thin yellow horizontal line runs along the bottom edge of the dark red box.
